

Fabric Covered Clothespin Magnets

1. Gather Materials: clothespins, scrap fabric, mod podge, paint brush, a good household glue and magnets

2. Cut fabric to fit clothespins. Brush mod podge onto the clothespins. Place a piece of fabric over the mod podge, and brush over the top with more glue. Smooth over the edges.

3. Once dry, glue the magnet with a good glue like E6000 to the back of the clothespins.

4. Let the glue dry completely, and you are finished! These work well on a refrigerator and as chip clips.
